

*The following is a prayer
to be said by the patient
before surgery*

Lord Jesus, I pray for your healing touch upon my body during my surgery. Guide the hands of the doctor and all who assist in the surgery. Use their skills to restore me to health and wholeness.

I ask you to remove any fear or anxiety from my mind and fill me with the peace that you alone can give. I place myself completely in your hands, Lord Jesus, trusting in your care and love for me. May my recovery be swift, my strength renewed, and my health restored.

Bless those, Lord, who are concerned about me today.

I need their love and support, and ask you to be with them in a special way. Replace any fear they have with your peace.

I place it all into your hands, Lord.
You are the Divine Healer. Amen
